Profile

Experienced Python Developer with 1 year indeveloping, testing, and maintaining scalable applications. Proficientin Python frameworks and adeptat collaborating on cross-functional teams. Seeking a challenging role to contribute technical expertise, drive project success, and further advance my skills in Python development

Experience

2023 - Present
Thaagam Foundation

Thaagam Foundation
Website & Dashboard (Live at Thaagam.org)
Thaagam.org Django, HTMX, MySQL, HTML ,CSS, BS5, JS, Ajax, and Git for stream lined homeless support donations. The platform ensures transparency with a user-friendly interface and admin dashboard. Recent enhancements include Razorpay and Easebuzz integration, providing a secure payment gateway. This addition enhances the donation experience, allowing users to contribute seamlessly across 10+ categories. Thaagam.org stands as a testament to technology-driven philanthropy, fostering efficient and transparent contribution management.

Thaagam HR Dashboard
(Live at thaagam.ngo/hr/candidate/)
Thaagam HR Dashboard Django, MySQL, HTML, CSS, BS5, JS, and Git to simplify office HR processes. Candidates receive a form link for submission, and data is stored in the database, accessible via the dashboard. This streamlines HR verification and shortlisting, enhancing efficiency in the candidate management process.

Client Projects :

Solving India's Problems (Live at https://solvingindiasproblems.com/)

JJ Borewells (Live at https://jjborewell.com/)

Karunai Karangal (Live at https://karunaikarangalindia.org/)

Global Life Tree Foundation (Live at https://globallifetreefoundation.world/)
